

# VISION BOARD

sobhanbera

First of all who am I. I am an engineering student studying at GHRCE Nagpur in the AI department. I am also a web developer, UI/UX designer and an open-source contributor for much time.

This is my vision board where I have told about some of the short terms as well as long term goals.

Goals exist on the top floor. Don't take the lifts just take stairs. And remember failure is one stair ahead towards your goal.

-sobhanbera

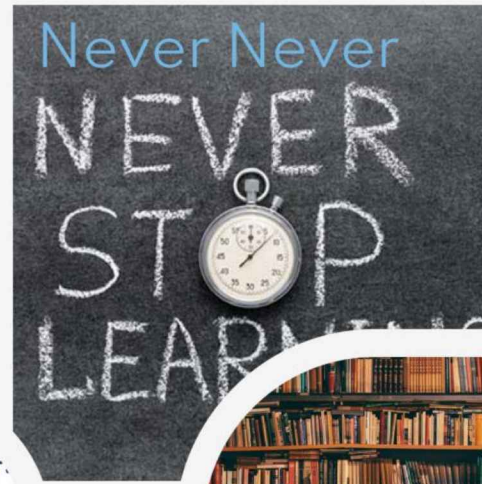

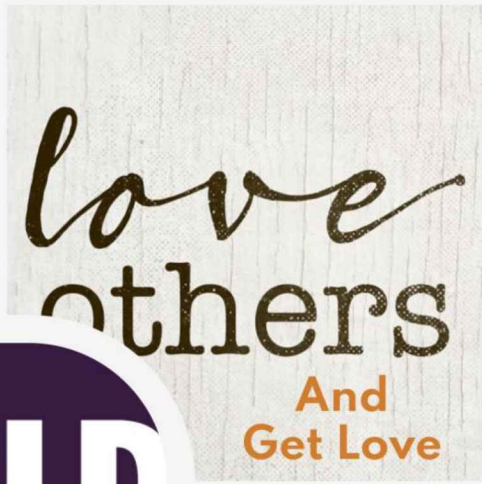

## Short Term Goal

To contribute more to Open-Source projects, Build great projects, CP....

## Long Term Goal

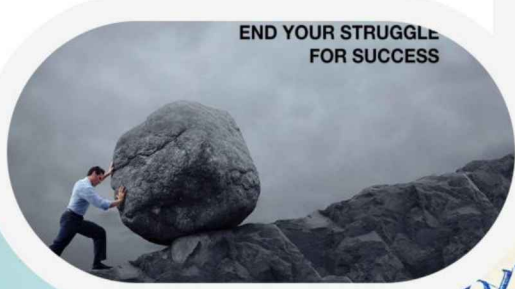

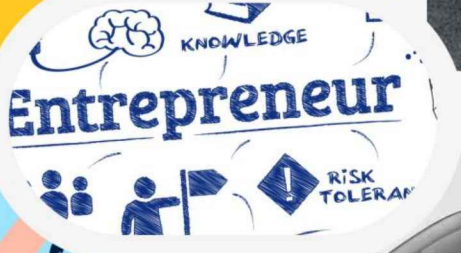

The first is to become a software engineering, then To become a solopreneur and start my software industry.

# VISION BOARD

**THANK YOU!**

Thank you very much mam to give me an idea to create this vision board.  
It may help me keep myself motivated tomorrow.

This is only 2 slides vision board because I could not think more in this.  
But I have given my 100% in this assignment.

This ppt/design could also be found at my GitHub Profile:
